

Breville BES870CBXL Barista Express Cranberry Red Espresso Machine

If you are looking for perfect americanos and macchiatos coffee maker then you won't find a better coffee machine than Breville Espresso Coffeemaker. Breville Barista Express Cranberry Red espresso machine has built-in conical burr grinder which allows you to adjust the coarseness. Burr grinder was designed to grind the flavorsome coffee beans straightly into the portafilter. The length of the portafilter is 54mm and made from stainless steel to avoid corrosion. Thanks to the digital temperature control, you can adjust the temperature of your espresso. That's not all, Breville Express Cranberry Red Espresso comes with a tamper and steamer wand that will help you create that lovely smooth latte.

The power required to run this machine is 1600 Watts and comes in cranberry red color. How will you know when your coffee is ready? It's simple, a red indicator is installed at the front and it will light up once your coffee is ready. Another feature of this machine is that it contains built-in patented razor dose trimming tool with a 15 bar pump which will make sure that you get high-quality coffee.

If you buy Breville Barista Express Cranberry Red Espresso Machine, you will not only receive the espresso machine but also a single wall filter basket (1 and 2 cups), Double wall filter baskets (1 and 2 cup), Coffee Scoop, Stainless steel milk jug, Cleaning tablets and disc, Cleaning tools (such as brush) and water filter and also a holder.

Technivorm Moccamaster 59616 KBG Coffee Brewer

Technivorm Moccamaster Coffee Maker is another amazing machine. It features a glass jug and an automatic drip stop brew basket which function is to stop the flow of coffee once the glass jug is pulled off. This product can make coffee in six minutes (40 oz). The best part is the unique hot plate. The hot plate allows your coffee to have the same temperature from top to bottom so that its users experience the same temperature coffee from their first sip to the last drop. You can set the hot plate either at 175° F or 185° F but don't worry, it won't burn your coffee.

Technivorm Moccamaster Coffee Maker saves energy by switching off after 100 minutes automatically. Every coffee machine is judged by the heating element and seems Technivorm Moccamaster Coffee Brewer has passed it successfully. The copper boiling element heats the water at speed of light to control brewing temperature between 196° F to 200° F which is one of the most important parts for making a good coffee. It also switches off automatically when the water tank is empty.

It is very simple to operate and doesn't make noise while brewing. The body is made from metal which makes it durable and the high-quality materials are used to make this coffee brewer even the manufacturers gives its user 5-year warranty. Don't like silver? No problem, Technivorm Moccamaster Coffee Maker comes with varieties of colors.

DeLonghi ESAM3300 Magnifica Super-Automatic Espresso/Coffee Machine

Let me introduce to the king of coffee maker, the one and only DeLonghi Magnifica Super Automatic Espresso Coffee Machine. Let's get this straight, this machine is quite beautiful in look. That silver color with a metallic front face and sides as well as the top are covered with molded black plastic, amazing right? One of the best features which makes it the king is because of its huge reservoir and double boiler system. The reservoir can hold up to sixty ounces of water which means that you can almost serve two liters of coffee. DeLonghi also contains a double boiler system which decreases the time in pouring coffee in cups. The metallic silver color body also helps in keeping the coffee hot.

Let's not forget about the integrated grinder which grinds the coffee beans in powder perfectly. The bean hoppers can hold up to 7 ounces of delicious coffee beans. You can access it through the top of the machine. You can also adjust the grinding settings by setting the dial which is located next to the hopper.

Another amazing feature is the tray. It looks ordinary but doesn't fall for that, the engineers designed this tray so that it keeps the coffee warm so you don't need to warm it up again. Last but not least, DeLonghi also has a telescoping coffee spigot which allows you to easily adjust the height of the dispenser to allow different sizes of cups to suit your taste.

Capresso 464.05 CoffeeTeam GS 10-Cup Digital Coffeemaker with Conical Burr Grinder

Capresso Coffeemaker is another amazing coffeemaker machine. The machine weight is 9 lb and dimensions are 9.75" D x 9.5" W x 15.5" H. The body is made up of ABS plastic with stainless steel and the conical burr grinder is made by stainless steel to make sure that tasty beans grind properly. The power required to run this machine is 900 Watts. Capresso Coffeemaker's brew has 3 different types of settings: Regular, Mild or Strong. That is not all, the brew also allows you two more options, either you can go for brew mode in which coffee is pre-grounded using a # 4 cone filter paper or you can go for Grind mode. One of the biggest advantages is that it can brew up to 200° F temperature. It has 50-ounce capacity in the reservoir and also has 6-ounce capacity in bean container.

The direct-feed technology feature allows an advance compact design which will keep the moisture away from the grinder. It has an automatic shutdown function as well after 2 hours. The advantage of using Capresso Coffeemaker is that its cleanup is very easy. You can take out the filter basket and can wash it easily. The unique part is that it contains a 24-hour programmable timer with an LCD display shows grind, strength and time settings. Thanks to the charcoal water filter which can remove about 82% of impurities such as chlorine etc. from the tap water.

Jura 15068 IMPRESSA C65 Automatic Coffee Machine

Automatic coffee machines make your life easier right? And your life is easier if you get bean grinder and milk heater in one place then say hello to Jura Impressa C65 Automatic Coffee Machine. It just contains one switch from which you can control temperature, select from 11 language settings and many more features. Jura Automatic coffee machine contains a thermal block heating system which will give you hot coffee quickly. Let's say that you don't want to drink coffee and in a mood for tea then no problem, this machine will heat the water enough and then you can steep your teabags.

Jura coffee machine uses 15 bar pump. This pressure will mix coffee beans in the brewing chamber with hot water resulting in high-quality coffee. One of the best features of Jura Coffee maker is its aroma and grinder. The unique design of grinder helps in extracting more aroma from all the beans. Jura is very simple to use and follows three steps. Make your choice by turning the knobs then press the button to start making coffee and lastly pour the coffee in the cup. Don't worry about the spills, the spouts are closer to your cup so that you don't worry about hot coffee splashing. If you think that's all then no, it also comes with different sizes. You can buy a Jura coffee maker according to your kitchen size. The cleaning process is very simple, just adjust the dial, add Jura cleaning tablets and some water then let the machine do its work.
